

# Instructions for Using the Autoresponders

Hi,

First up, you need an autoresponder account in order to build your list. If you do not have one, we highly recommend getting Aweber as they are probably the best around.

Check it out here: <http://www.imbuzzresources.com/aweber/>

Ok now moving on to how to load your autoresponder series...

You'll notice that there are two folders inside each product folder. One is called 'text' which contains the text autoresponders and the other 'video' which contains the video autoresponders. Note, you only need to load either one of them into your autoresponder.

First open the folder of the product you like to promote.

## **Let's take a look at the 'text' folder first.**

This is pretty straightforward as it contains the text autoresponders. Use these if you do not wish the video autoresponders.

There are 7 .txt files altogether numbered from '1' to '7' and they should be loaded into the broadcast sequence of your autoresponder according to the numbering.

**Eg.** '1.txt' is loaded first and so forth until '7.txt'

You need to open each .txt file and make some necessary changes first. Basically, they are:

1. **Headline:** This should be the subject headline for your autoresponder email. You need to insert it as the subject inside your autoresponder and delete it inside the email.
2. **The <firstname> tag:** Change it to the normal <firstname> tag of your autoresponder.
3. **The website link:** You need to insert your own affiliate link for the specific affiliate program.
4. **Your own name:** You need to enter your own name or a pseudonym at the end of the email.

That's it! Thereafter, you just need to load them accordingly into the broadcast sequence of your autoresponder. We recommend setting an interval of 2 days in between each autoresponder. That will help you to communicate with your prospects on autopilot!

## **Moving on to the 'video' folder**

As videos are the 'in' thing nowadays, by using the video autoresponders which we've prepared can certainly help differentiate you from the rest of the competition.

But note, if you are using the video autoresponders, please ignore the instructions earlier for the text autoreponders.

You'll see that there are 7.txt files altogether numbered from '1' to '7' and also 7 folders named 'video-1' to 'video-7'.

Let me explain what you need to do for the folders first. All the 7 video folders need to be uploaded onto your server via FTP.

Next, moving on to the .txt files. They should all be loaded into the broadcast sequence of your autoresponder according to the numbering.

**Eg.** '1.txt' is loaded first and so forth until '7.txt'

You need to open each .txt file and make some necessary changes first. Basically, they are:

1. **Headline:** This should be the subject headline for your autoresponder email. You need to insert it as the subject inside your autoresponder and delete it inside the email.
2. **The <firstname> tag:** Change it to the normal <firstname> tag of your autoresponder.
3. **The video link:** You need to insert the respective VIDEO links according to where you've uploaded the videos. For instance, if it's the first message, you'll see the 'Insert Video Link 1'. Replace this with:

<http://www.yourdomain.com/video-1/>

Replace "yourdomain" with the domain name where you've uploaded your videos.

And repeat this process all the way till the 7<sup>th</sup> message making sure that the video number corresponds with the message number. Eg. Video Link 2 should be <http://www.yourdomain.com/video-2/> and so and so forth.

4. Your own name: You need to enter your own name or a pseudonym at the end of the email.

That's it! Thereafter, you just need to load them accordingly into the broadcast sequence of your autoresponder. We recommend setting an interval of 2 days in between each autoresponder.

## Learn the **Secrets Methods** for Packing Your List Full of Hungry Buyers

Here's What You'll Learn In This Amazing Video Course:

- ✓ **A simple method for keeping your list red hot and responsive** to your offers (most marketers get this wrong, and end up burning out their list very quickly).
- ✓ **The 2 biggest list building mistakes**, and how to avoid them (which will save you thousands of dollars and years of frustration trying to figure out what's going wrong in your business).
- ✓ **My proven system for setting up an automated profit system.** Your new subscribers will make you tons of cash all on autopilot. You just have to get new leads, and the system does the rest (and it's super easy to set up).
- ✓ **3 simple methods for instant product development.** You'll *have your own product to sell in less than an hour* using any of these 3 methods.
